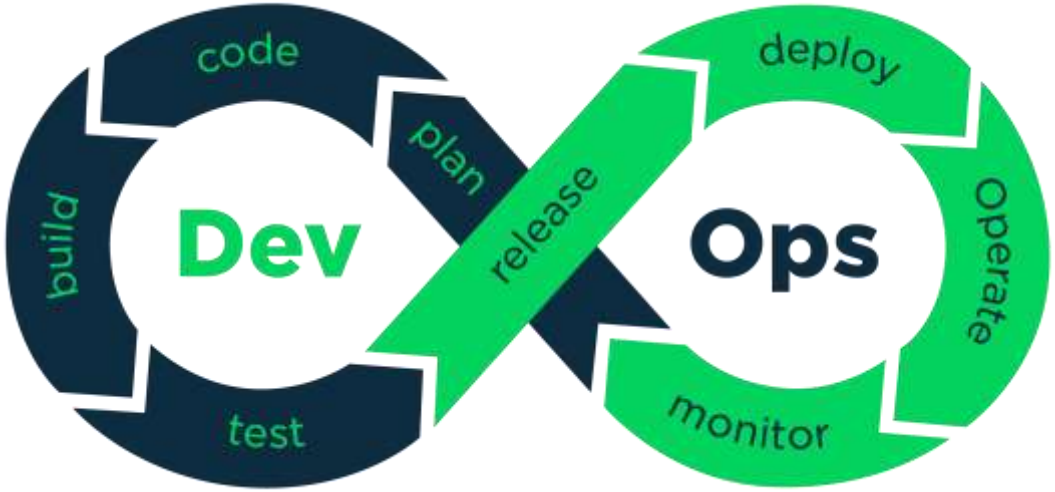
Jenkins



Jenkins: Staging Env

Install & Configure Tomcat As Staging Env

Jenkins : Tomcat

- Tomcat is an Open Source Web-Server and provides a ‘pure Java’ HTTP web server environment in which Java code can Run.

- Change TomCat Sever Port

Jenkin is using PORT 8080
Tomcat Default PORT 8080

Jenkins : Tomcat

- To Change the PORT user need to go to ../conf/server.xml file.

- Change the PORT of Connector

Jenkins : Deploy Artifacts Tomcat

- Jenkins needs to know some Credentials on Tomcat.

- Change User setting in Tomcat in ../conf/tomcat-users.xml file.
- Change the user: manager-script & admin-gui

Thank You
