POM.xml File in Maven

MAVEN: Build Tool

- **POM.xml** : A Project Object Model or POM is the fundamental unit of work in Maven. It is an XML file that contains information about the project and configuration details.
- POM is used by Maven to Build the Project.
- All dependencies and Support Plugins are defined in the POM file.
- All dependencies resolved during the compilation, which mentioned in POM file.

Will see you in Next Lecture...

Thank you!

A close-up photograph of a hand holding a black marker, completing the word 'Thank you!' in a cursive script on a white surface. The hand is positioned on the right side of the frame, with the index and thumb fingers visible, holding the marker. The marker is black with a silver band. The text 'Thank you!' is written in a fluid, cursive style, with the exclamation mark being the final stroke. The background is a plain, light-colored surface.
